

Is your child scheduled to receive a CT scan?

A research study needs
children ages 1 month to 7 years

The purpose of this study at Kapi'olani Medical Center for Women and Children is to find out whether the body shows signs of change from CT scans. The study needs children ages 1 month - 7 years old who get CT scans for medical reasons and who are willing to donate $\frac{3}{4}$ -1 $\frac{1}{2}$ spoonfuls of blood before and again after receiving the CT scan.

If you are interested in participating,
please contact:

-Dr. Brunhild Halm, MD (383-1430)

or

-Dr. Adrian Franke, PhD (586-3008)

Mahalo!
